

VAPT Report — Acme Corp — External Web & Infra Assessment

Prepared by Acme Security Consulting · 2026-08-31 09:56 UTC

Executive Summary

PentestIQ assessed 2 assets for engagement "Acme Corp — External Web & Infra Assessment" and identified 8 findings (overall risk rating: Critical). By severity: 1 critical, 1 high, 1 medium, 2 low. 1 finding was safely validated as exploitable through non-destructive checks (including: SQL Injection), removing false-positive doubt. The highest-priority item is "SQL Injection" (high, risk 95) on web:http://10.0.0.5:80.

Overall risk rating: Critical

Severity	Count
Critical	1
High	1
Medium	1
Low	2
Info	3

Assets: 2 · Findings: 8 · Validated: 1 · Dismissed: 0 · Chains: 4

Findings (8)

Risk	Severity	Title	Asset	Status
95	high	SQL Injection	web:http://10.0.0.5:80	validated
90	critical	Example RCE	infra:10.0.0.5	detected
50	medium	Weak TLS	infra:10.0.0.5	detected
28	low	Open port 23/tcp — telnet	infra:10.0.0.5	detected
25	low	X-Content-Type-Options Header Missing	web:http://10.0.0.5:80	detected
6	info	Open port 22/tcp — ssh (OpenSSH 8.2p1)	infra:10.0.0.5	detected
6	info	Open port 80/tcp — http (nginx 1.18.0)	infra:10.0.0.5	detected
5	info	nginx detected	infra:10.0.0.5	detected

Compliance Mapping

6 of 8 findings map to a recognized framework control (indicative, not a certification).

Framework	Controls touched
OWASP Top 10	A05: Security Misconfiguration (x4), A03: Injection (x1), A02: Cryptographic Failures (x1)
PCI-DSS	1.1.6 (x3), 6.5.1 (x1), 2.2 (x1), 4.1 (x1)
ISO 27001	A.13.1.1 (x3), A.14.2.5 (x1), A.14.1.2 (x1), A.10.1.1 (x1)
MITRE ATT&CK	T1046 (x3), T1190 (x1), T1590 (x1), T1040 (x1)

Authorized use only. Testing performed under an agreed engagement scope. Findings are confidential. Confidential — prepared for Acme Corp.
